Art Unit: 3723

Claims 1-3, 5, and 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3 "the hydraulic system" is merely inferentially included and not positively claimed. The metes and bounds of the claim cannot be ascertained since it is not clear if the "hydraulic system" is being claimed in combination with the jack. In claim 1, line 8 there is no proper antecedent basis for "the rotating shaft 2". Moreover if "2" is improper. If this numeral is intended to be a reference character it is required to be placed in parenthesis. In claim 1, line 13 there is no proper antecedent basis for "the rotating pin". In claim 2, line 3 it is unclear if "an axial rod" is the same or different axial rod that is recited in claim 1, lines 7-8. Further, claim 2 does not appear to further restrict a preceding claim since all the structural elements recited in claim 2 are found in claim 1. In claim 3, lines 2-4 there is no proper antecedent basis for "the inboard section" and "the outboard section". In claim 7, line 4 "crossways to axis on the side" is ambiguous. In claim 7, line 5 there is no proper antecedent basis for "the end face". In claim 7, line 9 there is no proper antecedent basis for "the stud". In claim 8, line 3 there is no proper antecedent basis for "the slot in the foot pedal".

Claims 4, 6, and 11-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

Analogous devices are taught by Yoshikawa, Carder, Hung, Koch et al, and Neibrandt.
